

## ENGINEERING EXHIBIT

### Application for Digital Television Station Auxiliary Antenna Construction Permit

prepared for

**WWAY-TV, LLC**  
WWAY(DT) Wilmington NC  
Facility ID 12033  
Ch. 24 47 kW 212 m

*WWAY-TV, LLC ("WWAY-TV")* is the licensee of digital television station WWAY(DT), Facility ID 12033, Channel 24, Wilmington NC. WWAY is licensed (file# 0000100423) to operate with a top-mounted directional antenna at 652 kW effective radiated power ("ERP") and 590 meters height above average terrain ("HAAT"). A minor modification Construction Permit application is pending (file# 0000217743) for WWAY to implement a replacement top-mounted directional antenna at 700 kW ERP and 592 meters HAAT. *WWAY-TV* herein seeks authorization for an auxiliary antenna for WWAY.

The proposed auxiliary antenna is side-mounted on the same tower structure as the licensed main antenna and will operate at 47 kW ERP (directional) and an antenna HAAT of 212 meters. As with the main antenna, the auxiliary antenna will be shared with stations WECT Channel 23 and WSFX-TV Channel 29, both Wilmington NC.<sup>1</sup>

The WWAY tower structure is associated with FCC Antenna Structure Registration number 1008242. No change to the overall structure height will result from this proposal.

The proposed auxiliary antenna is an elliptically horizontally polarized directional Dielectric model TFU-16WB/VP-R C160 (57.5 percent vertical polarization). The maximum horizontally polarized ERP is 47 kW and the maximum vertically polarized ERP is 27 kW. The vertically polarized component will not exceed the horizontally polarized component at any azimuth. The directional antenna's azimuthal patterns are supplied in Figures 1 and 1A for

---

<sup>1</sup>WECT and WSFX-TV are already authorized to construct a side-mounted auxiliary antenna facility (file numbers 0000207212 and 0000207374).

horizontal and vertical polarization, respectively. The antenna's elevation pattern is depicted in Figure 2.

Figure 3 shows that the  $41 \text{ dB}\mu$  noise limited service contour ("NLSC") of the proposed auxiliary facility does not extend beyond those of the licensed main and the proposed replacement main antenna facilities. Thus, the proposal complies with §73.1675(a).

### **Human Exposure to Radiofrequency Electromagnetic Field (Environmental)**

The proposed facility was evaluated for human exposure to RF energy using the procedures outlined in the FCC's OET Bulletin Number 65. Based on OET-65 equation (10) and 15 percent antenna relative field in downward elevations (pattern data shows 15 percent or less relative field at angles 25 to 90 degrees below the antenna), the calculated power density attributable to the proposed facility at locations near the transmitter site at a height of two meters above ground level is  $1.3 \mu\text{W}/\text{cm}^2$ , which is 0.4 percent of the general population / uncontrolled maximum permissible exposure limit. This is well below the five percent threshold limit described in §1.1307(b) regarding sites with multiple emitters, categorically excluding the applicant from responsibility for taking any corrective action in the areas where the proposal's contribution is less than five percent.

The general public will not be exposed to RF levels attributable to the proposal in excess of the FCC's guidelines. RF exposure warning signs will continue to be posted. With respect to worker safety, the applicant will coordinate exposure procedures with all pertinent stations and will reduce power or cease operation as necessary to protect persons having access to the site, tower, or antenna from RF electromagnetic field exposure in excess of FCC guidelines. This exhibit is limited to the evaluation of exposure to RF electromagnetic field. No increase in structure height is proposed.

## ELEVATION PATTERN

Proposal No. 20230110jmd  
 Date 10-Jan-23  
 Call Letters WWAY  
 Channel 24  
 Frequency 533 MHz  
 Antenna Type TFU-16WB/VP-R C160

RMS Directivity at Main Lobe  
 RMS Directivity at Horizontal

**14.4 ( 11.58 dB )**  
**13.6 ( 11.34 dB )**  
 Calculated

Beam Tilt 0.55 deg  
 Pattern Number 16W144055-24

<b>Channel and Facility Information</b>	<b>Section</b>	<b>Question</b>	<b>Response</b>
<b>Proposed Community of License</b>	Facility ID		12033
	State		North Carolina
	City		WILMINGTON
	DTX Channel		24
	Designated Market Area		Wilmington
<b>Facility Type</b>	Facility Type		Commercial
	Station Type		Auxiliary
<b>Zone</b>	Zone		2

Section	Question	Response
Antenna Location Data	Antenna Structure Registration	Do you have an FCC Antenna Structure Registration (ASR) Number?
		ASR Number
Coordinates (NAD83)	Latitude	34° 07' 54.0" N+
	Longitude	078° 11' 16.0" W-
	Structure Type	GTOWER-Guyed Structure Used for Communication Purposes
	Overall Structure Height	595.6 meters
	Support Structure Height	548.0 meters
	Ground Elevation (AMSL)	19.2 meters
Antenna Data	Height of Radiation Center Above Ground Level	207.9 meters
	Height of Radiation Center Above Average Terrain	211.9 meters
	Height of Radiation Center Above Mean Sea Level	227.1 meters
	Effective Radiated Power	47 kW

Antenna Technical Data	Section	Question	Response
	Antenna Type	Antenna Type	Directional Custom
		Do you have an Antenna ID?	No
		Antenna ID	
	Antenna Manufacturer and Model	Manufacturer:	Dielectric
		Model	TFU-16WB/VP-R C160
		Rotation	30 degrees
		Electrical Beam Tilt	0.55
		Mechanical Beam Tilt	Not Applicable
		toward azimuth	
	DTV and DTS: Elevation Pattern	Polarization	Elliptical
		Does the proposed antenna propose elevation radiation patterns that vary with azimuth for reasons other than the use of mechanical beam tilt?	No
		Uploaded file for elevation antenna (or radiation) pattern data
