

Request for Special Temporary Authority

Station WNX-Y-LD, Channel 10, New York City (Facility ID No. 29233) has been off the air pursuant to an FCC approved Silent STA since July 18, 2022 and thus must return to on-air operation by 11:59 pm July 17, 2023. After significant delays finalizing a lease at the site in the Station's outstanding construction permits and without the ability to return to the authorized site in its license, Licensee New York Spectrum Holding Company, LLC ("NYSHC") seeks authority to operate from a new site in order to get the station back on the air before the one-year off air deadline.

NYSHC has located a new site at which it can install its equipment expeditiously and is contemporaneously filing an application for modification to move to this new site. NYSHC hereby requests special temporary authorization to move the station and commence operation at the site designated herein.

Grant of this STA will serve the public interest by preserving the Station's license, and its service to the community.
