LMS File No. 0000214518 (KKDG etc.)
Multiple Ownership Study Supplement

This Supplement is being filed at the request of Commission staff to identify two additional "Clusters" of radio stations licensed to Winton Road with overlapping city grade contours. These Clusters are identified below and in the attached map as Clusters "C" and "D," and are in addition to Clusters A and B as identified previously in the Multiple Ownership Study.

Cluster C is comprised of the following stations (two FM and one AM):

KVFC-AM
KRTZ-FM
KISZ-FM

Cluster D is comprised of the following stations (three FM and one AM):

KDGO-AM
KKDG-FM
KPTE-FM
KISZ-FM

Station KISZ-FM is common to each of Clusters C and D. As set forth in the Engineering Report of Delawder Communications Inc. submitted as part of the Multiple Ownership Study for this application, there are at least 18 other full power radio stations, in which the assignee Hutton Broadcasting does not hold an attributable interest, the city grade contours of which overlap with the city grade contour of KISZ-FM, and all of which are located within 92 kilometers of the perimeter of each Cluster. Thus, Clusters C and D comply with Section 73.3555(a)(1)(iv) of the Commission's Rules, which provides that common ownership of up to three FM stations and two AM stations is permitted where the owner does not own more than 50% of the radio stations in the relevant market.
