

Twin Cities Public Television, Inc.

KTCA-TV, St. Paul, MN
Facility ID No. 68594

KTCI-TV, St. Paul, MN
Facility ID No. 68597

As part of the project to replace the shared transmitting antenna for both KTCA-TV and KTCI-TV,¹ as of August 8, 2023, both stations have been operating on a shared interim antenna at reduced power.

Specifically, the shared interim antenna is mounted on the same tower as the shared main antenna but at approximately the 800-foot level, using a 3.5" flex line as a temporary transmission line from the combiner to the interim antenna. The transmitters for both stations are outputting 7 kW, which represents approximately 28% normal power for KTCA-TV and 50% normal power for KTCI-TV.

It is anticipated that both stations will transition to their new shared antenna as specified in the construction permits listed in footnote 1 on or before August 28, 2023. Applications for licenses to cover for each station will be filed with the Commission at that time.

¹ The Commission granted construction permits on June 14, 2023, for both KTCA-TV and KTCI-TV to replace their shared antenna. See LMS File Nos. 0000216652 and 0000216653, respectively.
