

Request to Extend Engineering STA

WNMF-LD went on the air at its existing licensed facility since 1994. In November 2018, the Applicant lost the tower lease and went off the air.

On December 27, 2018, the Applicant was granted an Engineering Special Temporary Authority to operate WNMF-LD (File Number 0000063470) and has since been operating the station pursuant to the special temporary authority and its subsequent extensions.

The latest extension expired April 27, 2023 (File Number 0000201086). Licensee inadvertently did not timely file an extension request. Licensee respectfully requests reinstatement and renewal of its Engineering STA *nunc pro tunc*.
