

## **Request to Remain on Channel 200**

K200AA is currently operating on its authorized channel, 200. Construction Permit BPFT-20040211 was granted on 2/18/2004 to allow a move to restricted channel 200. Applicant requests the Commission to allow it to remain on channel 200 under the parameters of the instant minor modification application.

Channel 201 was selected in this application because error checking in the LMS electronic form does not allow channel 200 to be selected. Applicant desires channel 200 not 201.

Please refer to Exhibit 11 attached to this application. This exhibit was attached to the above mentioned Minor modification application explaining why a move to channel 200 was justified.
