

WZBY-FM Return to Power Operations

Beginning Saturday the 26th of August, station WZBY-FM resumed powered operation at licensed power (0.1 KW ERP) at site of license (47-58-39.5 N 89-41-05.3 W (**NAD 83**))

The station is operating with original programming material provided by the license owner; Carpenter Broadcasting LLC.

The spectrum was swept after the transmitter had been running for roughly 15 minutes, and found that the spectrum was within the spectrum mask and not causing interference outside of mask. The spectrum analyzer used was an Advantest R3131 Spectrum Analyzer.

All measurements were taken the day of resumption of power by myself, Nicolas Blomstrand under company name Commsulting LLC.
