

CHANNEL SHARING AGREEMENT EXHIBIT

WNET, licensee of television station WLIW, Garden City, NY, Fac ID No. 38336, has received authority to modify the WLIW facilities to enter into a new channel sharing agreement with station WMBQ-CD, New York, New York, Fac ID No. 14322, which is also licensed to WNET. *See* File No. 0000210410 granted February 9, 2023. Because WNET is the licensee of both WLIW and WMBQ-CD, they are commonly owned and no channel sharing agreement is required.

WNET is planning to convert Station WLIW to ATSC 3.0 (NextGen TV) and, as part of the conversion, WNET intends to convert Station WMBQ-CD to ATSC 3.0 and to broadcast the station's programming in 3.0 on WLIW. WNET anticipates that the conversion of WLIW and WMBQ-CD to ATSC 3.0 will occur during the second half of October 2023.

Following grant of this application, WNET will file the ATSC 3.0 applications for WLIW and WMBQ-CD. Because the instant application is part of a multi-step application process needed to permit the channel sharing changes and ultimate conversion of WLIW and WMBQ-CD to ATSC 3.0, WNET respectfully requests expedited processing of the instant application.
