

STATEMENT

Station K266BT was taken silent in order for the licensee to comply with the Commission's rules dealing with licensees only retransmitting primary stations that provide "fill-in" service on the applicable FM translator.

The licensee of K266BT has filed an application requesting a modification of license for the Station and expects to resume operations, involving the retransmission of a primary station licensed to the licensee, once that application has been consented to and the new facilities constructed.
