STA Extension Request

The licensee respectfully requests extension of authority to continue to operate pursuant to the parameters granted in LMS File Number [0000203830](#), which authorizes operation from a temporary tower due to the collapse of the tower supporting K12OC-D's licensed facility.

A new, permanent tower has now been erected, and the licensee will be filing an application for a minor modification to K12OC-D's license to specify the new tower.

The lapse in timely filing of the STA extension request was due to an inadvertent oversight in counsel's tickler system and issues relating to the integration of the tickler systems with the FCC's Licensing and Management System (LMS).
