

Special Operating Conditions – KONY, FID# 18140

The permittee/licensee in coordination with other users of the site will reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.

1. Applicant is requesting Program Test Authority. Supporting documentation being submitted herewith.
2. Results of radiofrequency electromagnetic (RF) field strength measurements throughout the transmitter site are submitted herewith. **Please see attachment entitled "RFR Exposure Measurements " for details.**
3. Applicant attests that operation authorized in this construction permit is in compliance with the spurious emissions requirements of 47 C.F.R. Sections 73.317(b) through 73.317(d). All measurements were made with all stations simultaneously utilizing the shared antenna. **Please see attachment entitled "Proof of Performance Report" for details.**
4. Supporting documentation of all Special Operating Conditions is submitted herewith.
