

Multiple Ownership

The instant application is one of two concurrently filed applications on FCC Form 2100, Schedule 315 which collectively seek Commission consent to the transfer of control of the more than 200 radio stations controlled by Alpha Media Holdings Inc. (“Alpha”) as described in the instant application.

I. Overview

The proposed transfer of control will not create any new combination of stations in any given local radio market, and no party to this application holds any other attributable media interests. This exhibit consists of demonstrations of continued compliance of existing Alpha station combinations with the local radio ownership rule (Alpha’s operations do not trigger any other of the FCC’s multiple ownership rules). Section II addresses Alpha stations assigned to Nielsen Metro markets. Section III addresses contour overlap combinations that include stations that are neither “home” to nor geographically within any Nielsen Metro market. These contour overlap combinations are analyzed in detail in the Contour Report of Guest Technology, LLC attached hereto.
