

Resumption Notification
KBZZ(AM) 1270 kHz Sparks, NV
K245DC Carson City, NV

On June 29, 2023 the KBZZ(AM) transmitter site was vandalized. The AC wiring was stripped and stolen, as was the air handling system. The AM station fell silent that time, and had to remain so until the wiring and air handling could be replaced. A request for Silent STA request was filed and granted.

KBZZ is retransmitted on FM translator K245DC Carson City. Under the terms of the K245DC license, the translator was taken silent during the duration of the AM station's silence. Therefore, a separate request for silent STA was also filed and granted for K245DC.

The KBZZ transmitter site has now been repaired, and both KBZZ and K2425DC have resumed operation with their licensed facilities.
