

Request for Experimental Special Temporary Authority

XGen Network LLC (“XGN”) hereby requests Special Temporary Authority (“STA”) for the period from October 30, 2023 to November 3, 2023, to operate an experimental low power television (“LPTV”) station on Channel 29 at Washington, DC for purposes of demonstrating the efficacy of 5G transmission in the television band to regulators, industry associations, and broadcast and wireless industry principals. The Engineering Narrative attached hereto demonstrates that the proposed experimental LPTV facilities are compliant with the experimental radio service requirements provided in Part 5 of the Commission’s rules. Accordingly, as the STA will enable XGN to demonstrate the efficacy of using LPTV stations to provide 5G services, grant of this request is in the public interest.
