

**REQUEST FOR ENGINEERING STA's FOR K32NN-D, K33PR-D,
K34PM-D, K35OF-D, and K36DK-D.**

On 03/29/2023, minor modifications to Construction Permits were filed with the FCC. These modifications related to a change in the transmit antennas and are currently pending with the Commission. Presumably, they are waiting for approval from the Canadian Communications Entity. The FCC file numbers are 0000213154, 0000213155, 0000213156, 0000213157, and 0000213158. We are requesting that STA's be granted so that construction can begin and be completed before the onset of Winter.
