

Request to Extend STA  
Radio License Holding CBC, LLC  
Station KRRQ(FM), Lafayette, Louisiana

**KRRQ(FM) Technical Narrative**

Radio License Holding CBC, LLC ("RLH-CBC"), licensee of Station KRRQ(FM), Lafayette, Louisiana, respectfully requests an extension of its Special Temporary Authorization ("STA"), pursuant to Section 73.1635 of the Commission's rules, to permit KRRQ to continue to operate from the existing tower identified by FCC ASR 1276024 until the owner of the KRRQ tower erects a new structure.

As explained by RLH-CBC's technical consultant in the original request for STA, the tower holding the KRRQ antenna had to be dismantled, has since been taken down, and Vertical Bridge, the tower owner, plans to erect a new tower in its place. Until this is accomplished, RLH-CBC requests an extension of its authority to operate KRRQ from the existing tower identified above using a Shively 6832 Series, four-bay, full-wave spaced antenna in the non-directional mode with 8.5 Watts effective radiated power. This is necessary until construction of the new tower is completed.

Accordingly, RLH-CBC respectfully requests an extension of the KRRQ STA until the new tower is constructed and the appropriate filing is prepared and submitted to the FCC. Positive action on this Extension Request will allow the Station to continue to serve its listeners in the Lafayette area until this is achieved.
