

ENGINEERING STATEMENT

The engineering data contained herein have been prepared on behalf of TV-49, INC., permittee of new digital television station KKEL-DT, Channel 27 in Ely, NV, in support of its application for modification of Construction Permit LMS-0000195589 to specify a new transmitter site.

It is proposed to mount an Dielectric DLP-8M(SP) directional, horizontally polarized slotted cylinder antenna at the 10.7-meter level of an existing 27-meter tower. Exhibit B is a map upon which the predicted service contours of proposed KKEL-DT are plotted. As shown, the entire community of license, Ely, Nevada, is encompassed by the proposed 48 dBu city-grade service contour. Exhibit C is a map on which the authorized and proposed noise-limited, dipole-adjusted service contours are plotted. Since this facility has not been constructed, no "loss-area" will be created by this proposal.

Azimuth and elevation pattern data for the Dielectric directional antenna is included in Exhibit D. Exhibit E contains the summary results from a TVStudy interference study, which was conducted using a cell size of 2.0 kilometers and increment spacing of 1.0 kilometer. It concludes that the proposed KKEL-DT facility meets the Commission's de minimis interference criteria to all co-channel and adjacent-channel full-power and Class A television facilities.

A detailed power density calculation is provided in Exhibit F.

Since no change in the overall height or location of the existing tower is proposed herein, the Federal Aviation Administration has not been notified of this application. Due to the diminutive height of the existing tower and its location with respect to the nearest airport

runways no FCC antenna structure registration is required. This conclusion is supported by the commissions TOWAIR program.

I declare under penalty of perjury that the foregoing statements and the attached exhibits, which were prepared by me or under my immediate supervision, are true and correct to the best of my knowledge and belief.

A handwritten signature in blue ink, appearing to read "Kyle T. Fisher". The signature is written in a cursive style with a horizontal line at the end.

KYLE T. FISHER

TVSTUDY INTERFERENCE ANALYSIS RESULTS
PROPOSED KREL-DT
CHANNEL 27 – ELY, NEVADA

Study created: 2023.10.24 10:30:43

Study build station data: LMS TV 2023-10-23

Proposal: KREL D27 DT CP ELY, NV

File number: BLANK0000195589

Facility ID: 776228

Station data: User record

Record ID: 58

Country: U.S.

Zone: II

Stations potentially affected by proposal:

| IX | Call | Chan | Svc | Status | City, State | File Number | Distance |
|----|------|------|-----|--------|--------------------|-----------------|----------|
| No | KNSO | D27 | DT | LIC | CLOVIS, CA | BLANK0000190993 | 461.7 km |
| No | KUED | D27 | DT | LIC | SALT LAKE CITY, UT | BLANK0000067865 | 280.3 |

No non-directional AM stations found within 0.8 km

No directional AM stations found within 3.2 km

Record parameters as studied:

SMITH AND FISHER

Channel: D27

Latitude: 39 14 45.70 N (NAD83)

Longitude: 114 55 42.00 W

Height AMSL: 2414.2 m

HAAT: 254.2 m

Peak ERP: 20.0 kW

Antenna: DIE-DLP-8M(SP) 35.0 deg

Elev Pattn: Generic

Elec Tilt: 1.00

40.0 dBu contour:

| Azimuth | ERP | HAAT | Distance |
|---------|---------|---------|----------|
| 0.0 deg | 16.6 kW | 414.4 m | 77.7 km |
| 45.0 | 19.5 | 436.3 | 79.9 |

| 225.0 | 1.68 | 323.7 | 58.5 |
| 270.0 | 1.23 | 208.2 | 50.3 |
| 315.0 | 8.71 | 305.0 | 66.3 |

Distance to Canadian border: 1084.1 km

Distance to Mexican border: 725.7 km

Conditions at FCC monitoring station: Livermore CA

Bearing: 256.3 degrees Distance: 617.3 km

Proposal is not within the West Virginia quiet zone area

Conditions at Table Mountain receiving zone:

Bearing: 80.2 degrees Distance: 832.8 km

Study cell size: 2.00 km

Profile point spacing: 1.00 km

Maximum new IX to full-service and Class A: 0.50%

Maximum new IX to LPTV: 2.00%

No IX check failures found.

POWER DENSITY CALCULATION

PROPOSED KKEL-DT
CHANNEL 27 – ELY, NEVADA

Since the FCC considers the possible biological effects of RF transmissions in its environmental determinations, we have studied the matter with respect to this Ely facility. Employing the methods set forth in *OET Bulletin No. 65* and considering a main-lobe effective radiated power of 20 kW (H) an antenna radiation center 10.7 meters above ground, and the specific elevation pattern of the proposed Dielectric DLP-8M(SP) antenna, a maximum power density value two meters above ground of 0.002 mW/cm^2 is calculated to occur northeast of the base of the tower. Since this is 0.669 percent of the 0.37 mW/cm^2 reference for uncontrolled environments (areas with public access) surrounding a facility operating on Channel 27 (548-554 MHz), a grant of this proposal may be considered a minor environmental action with respect to public exposure to non-ionizing electromagnetic radiation.

Further, the station owner will take whatever precautionary steps are necessary, such as reducing power or leaving the air temporarily, to ensure that workers operating in the vicinity of the antenna are not exposed to excessive non-ionizing radiation.
