

EXHIBIT

The instant application is being filed to request consent for a pro-forma transfer of control resulting from the addition of one individual member to the licensee—Coxswain Media, LLC. The licensee is a Manager-controlled limited liability company of which Steve Chessare is the Manager. Therefore, none of the individual members other than Mr. Chessare controls any votes. The new individual member—Jeffrey Schumacher-- will have 3% of the entity's equity. The addition of one new member will not result in a substantial transfer of control and the use of a short form pro forma application is appropriate. See 47 CFR Section 73.3540(f). Because this is a pro-forma transfer resulting from the addition of one individual member, there are no changes in the voting control of the licensee and there are no applicable agreements being filed.
