

## **TV Station WLPB-TV.Channel 25.Baton Rouge, Louisiana**

### **Environmental Exhibit**

The purpose of the application is to increase the effective radiated power of permitted Station WLPB-TV, Channel 25, Baton Rouge, Louisiana, from 355kW to 600kW. An environmental assessment is not required, as grant of the request would not be considered a major environmental action. The maximum calculated power density at 2 meters above ground was found to be less than 5% of the applicable public exposure limit (0.33 mW/cm<sup>2</sup> at Channel 25 center frequency of 539 MHz). The proposed operation is therefore categorically excluded under Section 1.1307(b)(3) of the FCC rules from having to consider the contributions of other stations at the site. None of the other factors specified in Section 1.1307 of the Rules are believed to apply.
