

TV Station KLPB-TV Channel 23 Lafayette, Louisiana Environmental Exhibit

The purpose of the application is to increase the effective radiated power of permitted Station KLPB-TV, Channel 23, Lafayette, Louisiana, from 137.4kW to 250kW. An environmental assessment is not required, as grant of the request would not be considered a major environmental action. The maximum calculated power density at 2 meters above ground was found to be less than 5% of the applicable public exposure limit (0.33 mW/cm² at Channel 25 center frequency of 539 MHz). The proposed operation is therefore categorically excluded under Section 1.1307(b)(3) of the FCC rules from having to consider the contributions of other stations at the site. None of the other factors specified in Section 1.1307 of the Rules are believed to apply.
