

**TECHNICAL CERTIFICATIONS AND ANTENNA DATA**

As the proposed assignee of KRCK-FM, VCY America, Inc. (“VCY”) is not in a position to certify whether the facility was constructed (1) as authorized in its underlying construction permit and (2) in compliance with all special operating conditions, terms, and obligations described in its construction permit. Although these questions are not germane to VCY’s request to change the status of the stations from commercial to non-commercial educational, VCY responded “yes” because the form required a response in order to validate and file.

Additionally, the information provided in the “Antenna Location Data” section of the form auto-filled and VCY completed the “Antenna Technical Data” section of the form with information from KRCK-FM’s construction permit. VCY makes no representations as to the accuracy of the information in either section. Responses were required for the form to validate and file.
