

The purpose of this request is to seek a new special temporary authorization to operate with the facilities authorized on May 24, 2022 in LMS File No. 0000190908 and most recently extended on June 27, 2023 in LMS File No. 0000217163.

The K278CU antenna is currently side-mounted on the tower of co-owned primary station KBKW(AM), Aberdeen, Washington. Since June 27, 2023 We obtained reasonable assurance of the availability of a new permanent transmitter site for K278CU which will provide for better coverage of Aberdeen and surrounding Grays Harbor County, Washington. We filed a minor change application with the FCC, which was assigned the LMS file number 0000219340, and this was granted on September 1, 2023.

This is to request a 180 day extension of our current engineering STA, which will allow K278CU to remain on the air while we prepare to construct K278CU at its newly authorized site.

The public interest, convenience and necessity will be served by a grant of this STA extension request.
