

## STA EXHIBIT

America-CV Station Group, Inc. (“ACV”), licensee of Station WJWN-TV, San Sebastian, Puerto Rico, is seeking to extend its special temporary authority to operate at reduced power.<sup>1</sup> The Station continues to have problems with a full service mask filter that does not function properly. ACV continues to diligently attempt to find solutions to this issue, but needs more time to do so. ACV anticipates that this process will take approximately 180 days.

In the meantime, the Station is operating with a lower powered, temporary transmitter, with an ERP of 280 kilowatts, which is 45% of authorized ERP.

Grant of the requested STA will serve the public interest by allowing the Station to provide service to the public, while giving it time to find the best solution to operate at full authorized power.

---

<sup>1</sup> An STA was previously granted on July 7, 2023 – File No. 0000217027.
