

## **Reasons for Minor Mod. of License App. W34FK-D**

TV Red de Puerto Rico is requesting a Minor License Modification of LPTV Station W34FK-D, Toa Baja, Puerto Rico, Facility ID: 181838, to change the station site, as the existing site is no longer available. A Silent notification and a request for a Silent STA has already been filed for this station. The proposed new site is located 17.4 miles from the licensed site and as shown in the included Figure 1, there will be considerable overlap of the service contours.

A copy of the TVStudy, performed with a L-R cell size of 0.5 km. and terrain profile increment of 0.05 km. is included. As shown in the TVStudy, no adverse interference will be caused to any other TV facility by this proposal. As the existing tower of LPTV station WQSJ-CD will be used, and the calculated RF exposure will be within the FCC guidelines, no negative environmental impact is expected from the proposal. A copy of the RF exposure and environmental impact study, and a copy of the notification letter to the Arecibo Observatory are included with this application.
