

Resumption of Full Power Operation Notification Exhibit

On January 2, 2024, the Bankruptcy Estate of Golden State Broadcasting, LLC (“Golden State”), controlled by Michael W. Carmel, Esq., the Chapter 11 Trustee (“Trustee”) appointed by the bankruptcy court, and the licensee of KREV(FM), Alameda, California (Facility ID No. 36029, “KREV”), filed a notification that the minor change authorized by construction permit LMS File No. 0000232003 (the “Permit”) had been constructed in accordance with the Permit, and KREV commenced operation with those facilities under automatic program test authority on Friday, December 29, 2023. See LMS File No. 0004234618 (the “PTA Notification”).

Golden State also advised, see PTA Notification at Program Test Authority and Reduced Power Notification Exhibit, that the new facilities were using a temporary nondirectional antenna, mounted at the height authorized by the Permit, which due to issues during retuning was operating at a reduced power, of approximately 300 watts effective radiated power (“ERP”) rather than the 790 watts ERP authorized by the Permit (so at approximately 38% of authorized ERP), as permitted by Section 73.1560(d) of the Commission’s Rules, 47 C.F.R. § 73.1560(d).

The antenna from the previously licensed site has now been moved to the new tower site and installed as a nondirectional antenna, which allows KREV to now operate at its full power of 790 watts ERP as authorized by the Permit, where replacement of one nondirectional antenna with another nondirectional antenna is permissive under Section 73.1690(c)(1) of the Commission’s Rules, 47 C.F.R. § 73.1690(c)(1). With this resumption of full power operations within 30 days, a request for special temporary authority to operate with reduced power will not be necessary.
