

## **WNIX-AM GREENVILLE, MS TECHNICAL EXHIBIT**

On February 4, 2024, a concrete truck from Robert Leonard & Sons Contractors was on-site at the WNIX transmitter facility at 329 Belhaven in Greenville, MS, for the purpose of pouring a foundation for a new transmitter building. After pouring concrete, the concrete truck somehow ran into a guy wire anchor and pulled the WNIX tower down. WNIX(AM) and translator station W266BY are both off-air.

We intend to have temporary facilities on-air as soon as possible pending construction of a new tower.
