

**K285FC, Jefferson City, MO (Fac. Id. 140026)**  
**Silent STA Extension Justification**

UNWSP has been able to identify for repair those operational anomalies with station equipment that were discovered and caused a cessation of operations for evaluation, safety and compliance. An antenna replacement is pending, and UNWSP is working with the antenna structure landlord to modify the lease to accommodate necessary changes at the site. UNWSP hopes to return the station to on air operations within 2 months, but respectfully requests temporary authority to remain silent through August 10, 2024 while it works to restore this facility in order to serve the public with a reliable signal.
