

**Amendment to Narrative Statement  
EGOT Media, LLC**

**Request for Part 5 Experimental Authority**

EGOT Media, LLC (“EGOT”) hereby respectfully files this amendment to its pending request for experimental special temporary authority (File No. 0000237205), to utilize WYJH-LD, Channel 27, licensed to White Lake, New York (Facility No. 31642),<sup>1</sup> to undertake testing of a new 5G-based radio service (“5G Broadcast”) for a 6-month period.

Presently, WYJH-LD provides the English-language version of the France24 network on its ATSC 1.0 digital stream. While 5G Broadcast testing is underway, France24 will continue to be carried on station WYNB-LD, Channel 30, Ellenville, New York. WYNB-LD is licensed to Skywalker Media LLC, a company which shares members and principals with EGOT. Because the coverage area of WYNB-LD is significantly larger than that of WYJH-LD, no current viewer of France24 will experience any loss in service during the period that this Experimental STA is active.

In addition, WYJH-LD is not carried by any multichannel video programming distributors, and thus no MVPD systems or viewers will be impacted by a grant of this request.

No other changes are being proposed by this amendment.

---

<sup>1</sup> On January 23, 2024, EGOT filed a request with the Commission to change the community of license for WYJH-LD to Danbury, CT.
