

AMENDMENT TO LPTV EXPERIMENTAL STA APPLICATION

The sole purpose of this amendment is to advise the Commission that, during the period of proposed 5G Broadcast experimental operations, the programming currently carried on the primary ATSC 1.0 digital stream of WTXX-LD will continue to be carried on co-owned station WRNT-LD, RF Channel 32, Hartford, Connecticut. Because the coverage area of WRNT-LD is significantly larger than that of WTXX-LD, no current viewer of WTXX-LD will experience any loss in service during the period that this Experimental STA is active. In addition, WTXX-LD is not carried by any multichannel video programming distributors, and thus no MVPD systems or viewers will be impacted by a grant of this request.
