

## Request for Silent Authority

---

The licensed W273DG transmission facility (FCC File No. BLFT-20180305AAW) has been dismantled. The Applicant is in the process of repurposing some of the W273DG transmission equipment to implement the translator's outstanding the construction permit (FCC File No. 0000237977; new call sign W275DF) on a different frequency at a different transmitter site.

Accordingly, the Applicant requests authority to remain silent on its licensed frequency for a short time until technical facility authorized in the outstanding construction permit is operational. The Applicant requests silent authority for a period of 90 days to accomplish this task although the station is expected to be operational much sooner.
