

WRMK-LPFM Minor Modification

This technical report is submitted for minor modification to WRMK-LP 262 LP100 at Augusta, GA, FCC facility ID 124210. A coordinate correction is submitted.

WRMK-LPFM Modification Analysis:

A channel study in exhibit E-1 shows the WRMK-LPFM modification at channel 262 is fully spaced at its site at the corrected coordinates:

33-30 12.3 N 082 03 35.4W NAD 83.

A TOWAIR study (exhibit E-2) is included demonstrating that the facility does not require registration. An OMB MP-1 single bay, non-directional antenna will be mounted at a COR AGL of 30.0 meters, 115.1 meters AMSL, 23.3 meters HAAT (exhibit E-3) and will operate at 0.100 kW ERP. The average distance to the 60 dBu contour is calculated is 5.6 km. The 60 dBu contour overlaps the current 60 dBu contour licensed facility (exhibit E-4).

RF Exposure Calculation:

The RF contribution of the WRMK-LPFM modification was calculated using the FMModel program (exhibit E-5). The resulting value is $5.13 \mu\text{W}/\text{cm}^2$ at a distance of 7.6 meters from the base of the tower, which is less than 5% of the $200 \mu\text{W}/\text{cm}^2$ maximum permissible for general public, uncontrolled exposure, allowing exclusion from consideration.

Conclusion:

It is submitted the minor modification application for WRMK-LPFM is in full compliance with the Commission rules and policies.

A handwritten signature in black ink, appearing to read "Christopher Anderson", is written over a horizontal line.

TOWAIR Determination Results

A routine check of the coordinates, heights, and structure type you provided indicates that this structure does not require registration.

*** NOTICE ***

TOWAIR's findings are not definitive or binding, and we cannot guarantee that the data in TOWAIR are fully current and accurate. In some instances, TOWAIR may yield results that differ from application of the criteria set out in 47 C.F.R. Section 17.7 and 14 C.F.R. Section 77.13. A positive finding by TOWAIR recommending notification should be given considerable weight. On the other hand, a finding by TOWAIR recommending either for or against notification is not conclusive. It is the responsibility of each ASR participant to exercise due diligence to determine if it must coordinate its structure with the FAA. TOWAIR is only one tool designed to assist ASR participants in exercising this due diligence, and further investigation may be necessary to determine if FAA coordination is appropriate.
