**ENGINEERING REPORT**

---

**K242CW, Oxnard, CA, Site-move Minor Change (242D)**

**ENGINEERING STATEMENT**

This is a re-filing of the expired minor modification that was submitted on February 16, 2021 (LMS File No. 0000136352). I have reviewed the engineering showing of 0000136352 and nothing material has changed that would preclude the grant of a new CP.

It is noted that KCAQ Camarillo, CA (FCC Facility ID 70563) is a second adjacent-channel FM station that is licensed on channel 240B1 and was shown as protected by the original engineering statement of 0000136352. KCAQ also now has a granted channel 240B1 construction permit (in addition to its licensed facility). The KCAQ CP signal at the proposed translator site is 13 dB higher than that of its licensed facility. Therefore, the KCAQ CP facility is adequately protected by this re-filing.
