

### **Next Gen Television Deployment Plan**

TEGNA Inc. ("TEGNA"), on behalf of its subsidiary KENS-TV, Inc. ("Licensee"), licensee of television station KENS, San Antonio, Texas ("KENS") (Facility ID 26304), herein applies for Commission authority to establish a Next Gen Television (ATSC 3.0) simulcast of KENS's primary channel, commencing on February 22, 2024, via the facilities of KSAT-TV, San Antonio, Texas (Facility ID 53118) ("KSAT"), licensed to Graham Media Group, San Antonio, Inc. ("KSAT Licensee"). KSAT is applying for authority to convert to Next Gen Television operation<sup>1</sup> and has agreed to host a Next Gen Television simulcast of KENS's CBS-affiliated primary channel.

KENS, in turn, has agreed to host KSAT's H&I-affiliated multicast channel in ATSC 1.0 format in order to preserve existing service in the San Antonio market. To avoid viewer confusion, the KSAT-originated multicast stream would retain its existing PSIP virtual channel. Licensee and KSAT Licensee have entered into channel sharing agreements, in accordance with Section 73.3801 of the Commission's rules, to govern these reciprocal hosting arrangements.
