

**K207AY, St. Robert, MO (Fac. Id. 36256)**  
**Silent STA Justification**

Recently acquired FM translator K207AY ceased operation on March 13, 2024 due to transmitter and antenna equipment failures. Initial analysis indicates that equipment replacement as well as a possible site change may be necessary to restore reliable broadcast operations. UNWSP will seek a construction permit if required for any changes to the equipment or site. UNWSP respectfully requests temporary authority to remain silent for 180 days while it works to restore this facility to operational status with reliable equipment in order to serve the public.
