

Silent STA Extension
KRMF-LD 182553
Reno, NV

KCNL is requesting an extension of STA 0000221653. After the lightning strike that caused damage to the PA, we have been in communication with Anywave attempting to find solutions for repair. As our unit is quite old and was part of an extremely limited manufacturing run where only 4 units of its kind were produced, finding suitable replacement parts has been a difficult process. We have currently identified several repair options and are evaluating which one will be the most financially feasible while also offering the best long term solution.
