

Reduced Power Notification

This exhibit is to advise the Commission that WWDW (the “Station”) is operating at reduced power.

On or around March 11, 2024, a power amplifier at the Station’s transmitter failed. The Station is currently operating at approximately 50 percent of authorized power. The Station is in the process of repairing the power amplifier.

The licensee will notify the Commission once full authorized operations have been restored and will seek STA if the reduced power situation will last longer than 30 days.
