

**RF Exposure Statement  
STA Application  
WYES-TV New Orleans, LA  
Channel 28  
March 19, 2024**

The facility proposed in this application will have an effective radiated power (ERP) of 125 kW and a center of radiation 213.4 meters above ground level (AGL). An analysis of the radiation levels at 2 meters AGL indicate the RF exposure level will be well below the allowable limit for an uncontrolled area and, therefore, meets the requirements. All other current safeguards related to the site with regard to both workers and the general public will remain in place.
