We have been unable to resolve this issue. LMS neither requests nor displays the DBA line on the live application form. Therefore, this spurious DBA cannot be deleted by the applicant.

The applicant has made numerous attempts to resolve the issue via email with FCC Staff and via the Help Desk, and the issue remains unresolved.

The current transmitter site will soon be unavailable to the licensee, and the relocation to the new site must be done expeditiously. As a result, the application must be filed leaving this issue unresolved.

The certification made by the applicant that the application is correct applies to all other aspects of the application, but it does not apply to the spurious DBA entry on the form.
