

**Resumption Notification**  
**KBZZ(AM) 1270 kHz Sparks, NV**

On June 29, 2023 the KBZZ(AM) transmitter site was vandalized. The AC wiring was stripped and stolen, as was the air handling system. The AM station fell silent that time, and had to remain so until the wiring and air handling could be replaced. A request for Silent STA request was filed and granted.

After repairs, KBZZ resumed operation with its licensed facilities on October 4, 2023, and a resumption notification was filed. Operation of KBZZ started out okay, but became progressively worse. It became apparent that the repairs were insufficient, and the station was taken silent again on October 11, 2023, having operated for eight days.

The KBZZ transmitter site has now been repaired, and KBZZ has resumed operation on March 27, 2024 with its licensed facilities.
