

Technical Report Supporting a Minor Modification of a FM Translator Station Construction Permit Application

Pursuant to 47 C.F.R. Section 74:

for

*W296EH.L(W224EL.C) – La Crosse, WI
LMS(lic)-0000145864 (license)
LMS(cp)-0000197677 (construction permit)
(Facility ID: 145081)*

The applicant would like to note a request for 47 C.F.R. Section 73.3517 Contingent Processing between applications for FM Translators K220EP – La Crescent, MN (Facility ID: 20571) and W296EH – La Crosse, WI (Facility ID: 145081). Both applications have been filed concurrent with one another and reference this Section 73.3517 Contingent Processing Request within each filing. In this instance, K220EP requests a site change and 47 C.F.R. Section 74.1233(a)(1)(i)(A)(1) adjacent channel change from CH220D to CH223D. To accommodate this frequency change, W296EH will further modify its currently authorized 47 C.F.R. Section 74.1233(a)(1)(i)(A)(2) non-adjacent CH296D to CH224D(W224EL.C) channel change Construction Permit (LMS(cp)-0000197677) from a non-directional antenna to a directional antenna. This NDA-to-DA antenna change for the existing W296EH(W224EL.C) facility will allow both stations to fully protect each other without the need for further contingent special conditioning at the time of each stations' licensing.

*as a
Commercial, Fill-In
FM Translator for
WKBH-FM(HD3) – Onalaska, WI*

Explanation of Technical Report

1

EXPLANATION OF PROPOSAL: This LMS filing and accompanying technical report supports a Minor Modification of a FM Translator Station Construction Permit Application for FM Translator W296EH.L – La Crosse, WI (Facility ID: 145081). W296EH.L is licensed under LMS(lic)-0000145864. W296EH(W224EL.C) also holds existing Construction Permit LMS(cp)-0000197677. This Schedule 349 filing modifies existing W296EH(W224EL.C) Construction Permit LMS(cp)-0000197677 against the current License. This filing requests a continued 47 C.F.R. Section 74.1233(a)(1)(i)(A)(2) non-adjacent channel change from CH296D (107.1 MHz) to CH224D (92.7 MHz) based upon a showing of reduced interference. Operation on the new frequency of CH224D (92.7 MHz) with a directional power of 0.225 kW ERP circular polarization (H&V) is requested. The FM Translator will operate from the same COR of 498.4 meters AMSL at the same site location. This filing will specify continued rebroadcast of the HD3 subchannel of Class C3, FM Primary Station WKBH-FM(HD3) – Onalaska, WI (CH274C3; 102.7 MHz); Facility ID No. 72206. The Translator will remain licensed to the community of La Crosse, WI.

The applicant would like to note a request for 47 C.F.R. Section 73.3517 Contingent Processing between applications for FM Translators K220EP – La Crescent, MN (Facility ID: 20571) and W296EH – La Crosse, WI (Facility ID: 145081). Both applications have been filed concurrent with one another and reference this Section 73.3517 Contingent Processing Request within each filing. In this instance, K220EP requests a site change and 47 C.F.R. Section 74.1233(a)(1)(i)(A)(1) adjacent channel change from CH220D to CH223D. To accommodate this frequency change, W296EH will further modify its currently authorized 47 C.F.R. Section 74.1233(a)(1)(i)(A)(2) non-adjacent CH296D to CH224D(W224EL.C) channel change Construction Permit (LMS(cp)-0000197677) from a non-directional antenna to a directional antenna. This NDA-to-DA antenna change for the existing W296EH(W224EL.C) facility will allow both stations to fully protect each other without the need for further contingent special conditioning at the time of each stations' licensing.

FACILITY COMPLIANCE SHOWINGS: The proposed Translator remains in compliance with 47 C.F.R. Section 74.1232 as noted herein. A map of the proposed 60 dB μ service contour in relation to the present 60 dB μ service contour has been included in **Exhibit 1**. The minor change proposed service area will overlap a portion of the presently licensed service area as noted in the exhibit. The proposed Translator 60 dB μ contour lies wholly inside the larger FM Class C3 primary 60 dB μ contour. The primary station service contour relationship has been plotted in **Exhibit 2**. Regarding permission to retransmit the primary station; both WKBH-FM(HD3) and CH224D.P(W296EH) are under common control of Magnum Communications, Inc (David R. Magnum); therefore, permission to rebroadcast is implied.

The proposed facility will be located on the tower bearing Antenna Structure Registration Number 1026950. In support of this filing, a copy of the ASRN has been included in **Exhibit 3**. A depiction of the tower and antenna configuration has been included in **Exhibit 4**. Further notification to the FAA or ASR governing authorities is not required as this proposal will not increase the overall tower height.

The applicant would like to note use of the FCC 30 second terrain database for all allocation, contour and HAAT showings contained herein. A copy of the proposed HAAT calculation, demonstrating compliance with 47 C.F.R. Section 74.1235, has been included in **Exhibit 5**.

The applicant certifies compliance with 47 C.F.R. Section 74.1234 regarding access to the transmitter site, at all hours and in all seasons; and/or providing means to turn on and off, at will, the transmitting apparatus from a point which is readily accessible at all hours and in all seasons. In addition, the transmitter is equipped with suitable automatic circuits which will place it in a non-radiating condition in the absence of a signal on the input channel; with the transmitting apparatus adequately protected against tampering by unauthorized persons.

ALLOCATION COMPLIANCE SHOWINGS: The proposed Translator remains in compliance with 47 C.F.R. Section 74.1204 & 74.1205 toward all allocation protection concerns with the exception of WIZM-FM - La Crosse, WI (CH227C0) and K222AG - La Crosse, WI (CH222D). A general allocation study for this proposal is found in **Exhibit 6**. There are three (3) additional facilities, existing or proposed, close enough to merit further study. Therefore, a supplemental contour protection study has been provided toward each facility as included in **Exhibit(s) 7(a-c)**.

The applicant would like to note the existence of a 47 C.F.R. Section 74.1204(d) Second/Third Adjacent Channel Given Interference Waiver Request toward WIZM-FM - La Crosse, WI (CH227C0) and K222AG – La Crosse, WI (CH222D) as included in **Exhibit 8**. Protection of the worst case calculated 122.3 dB μ F(50:10) Interference Contour, corresponding to the worst case calculated 82.3 dB μ F(50:50) Protected Contour, has been demonstrated through a downward radiation study. Full protection will be afforded all concerns as this area will not reach the ground nor a five meter artificial plane representing a standard two story house when taking into account the downward radiation characteristics of the antenna as supplied by the antenna manufacturer. A copy of the manufacturer's directional and vertical antenna specifications has been included in **Exhibit 9**.

The applicant would further note the previously request for 47 C.F.R. Section 73.3517 Contingent Processing between K220EP – La Crescent, MN (Facility ID: 20571) and W296EH – La Crosse, WI (Facility ID: 145081). In this instance, K220EP requests a site change and 47 C.F.R. Section 74.1233(a)(1)(i)(A)(1) adjacent channel change from CH220D to CH223D. To accommodate this frequency change, W296EH will further modify its currently authorized 47 C.F.R. Section 74.1233(a)(1)(i)(A)(2) non-adjacent CH296D to CH224D(W224EL.C) channel change Construction Permit (LMS(cp)-0000197677) from a non-directional antenna to a directional antenna as noted in **Exhibit 7b**. This NDA-to-DA antenna change for the authorized W296EH(W224EL.C) facility will allow both stations to fully protect each other without the need for further contingent special conditioning at the time of each stations' licensing.

Regarding protection of international concerns, the facility is, and will remain, more than 320 km from the common border between the United States and Canada or Mexico. As a result, no further international protection showings are believed required.

ENVIRONMENTAL COMPLIANCE SHOWINGS: The proposed facility complies with the maximum permissible radiofrequency electromagnetic exposure limits for controlled and uncontrolled environments as set forth under §1.1310 and/or §1.1307(b)(3) of the Commission's rules and the RF radiation protection guidelines as set forth in OET Bulletin No. 65 (Edition 97-01), and the accompanying Supplement A, (Edition 97-01). Compliance has been demonstrated in the attached **RF Appendix 1** of this filing. The facility is, or will be, properly marked with signs. Entry is, or will be, restricted by means of fencing, locked doors or gates. In addition, coordination with other users of the site will be secured to reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.

Regarding compliance with the NEPA, Nationwide Programmatic Agreement and NHPA Section 106 for tower co-location, compliance with the Agreement is not required where no new tower construction is being proposed and the tower is not being substantially altered. Specifically, compliance is not necessary where only an antenna is being replaced on an existing structure, as here. However, should the Commission determine compliance is necessary, upon notification to the applicant, the applicant will file FCC Form 621.

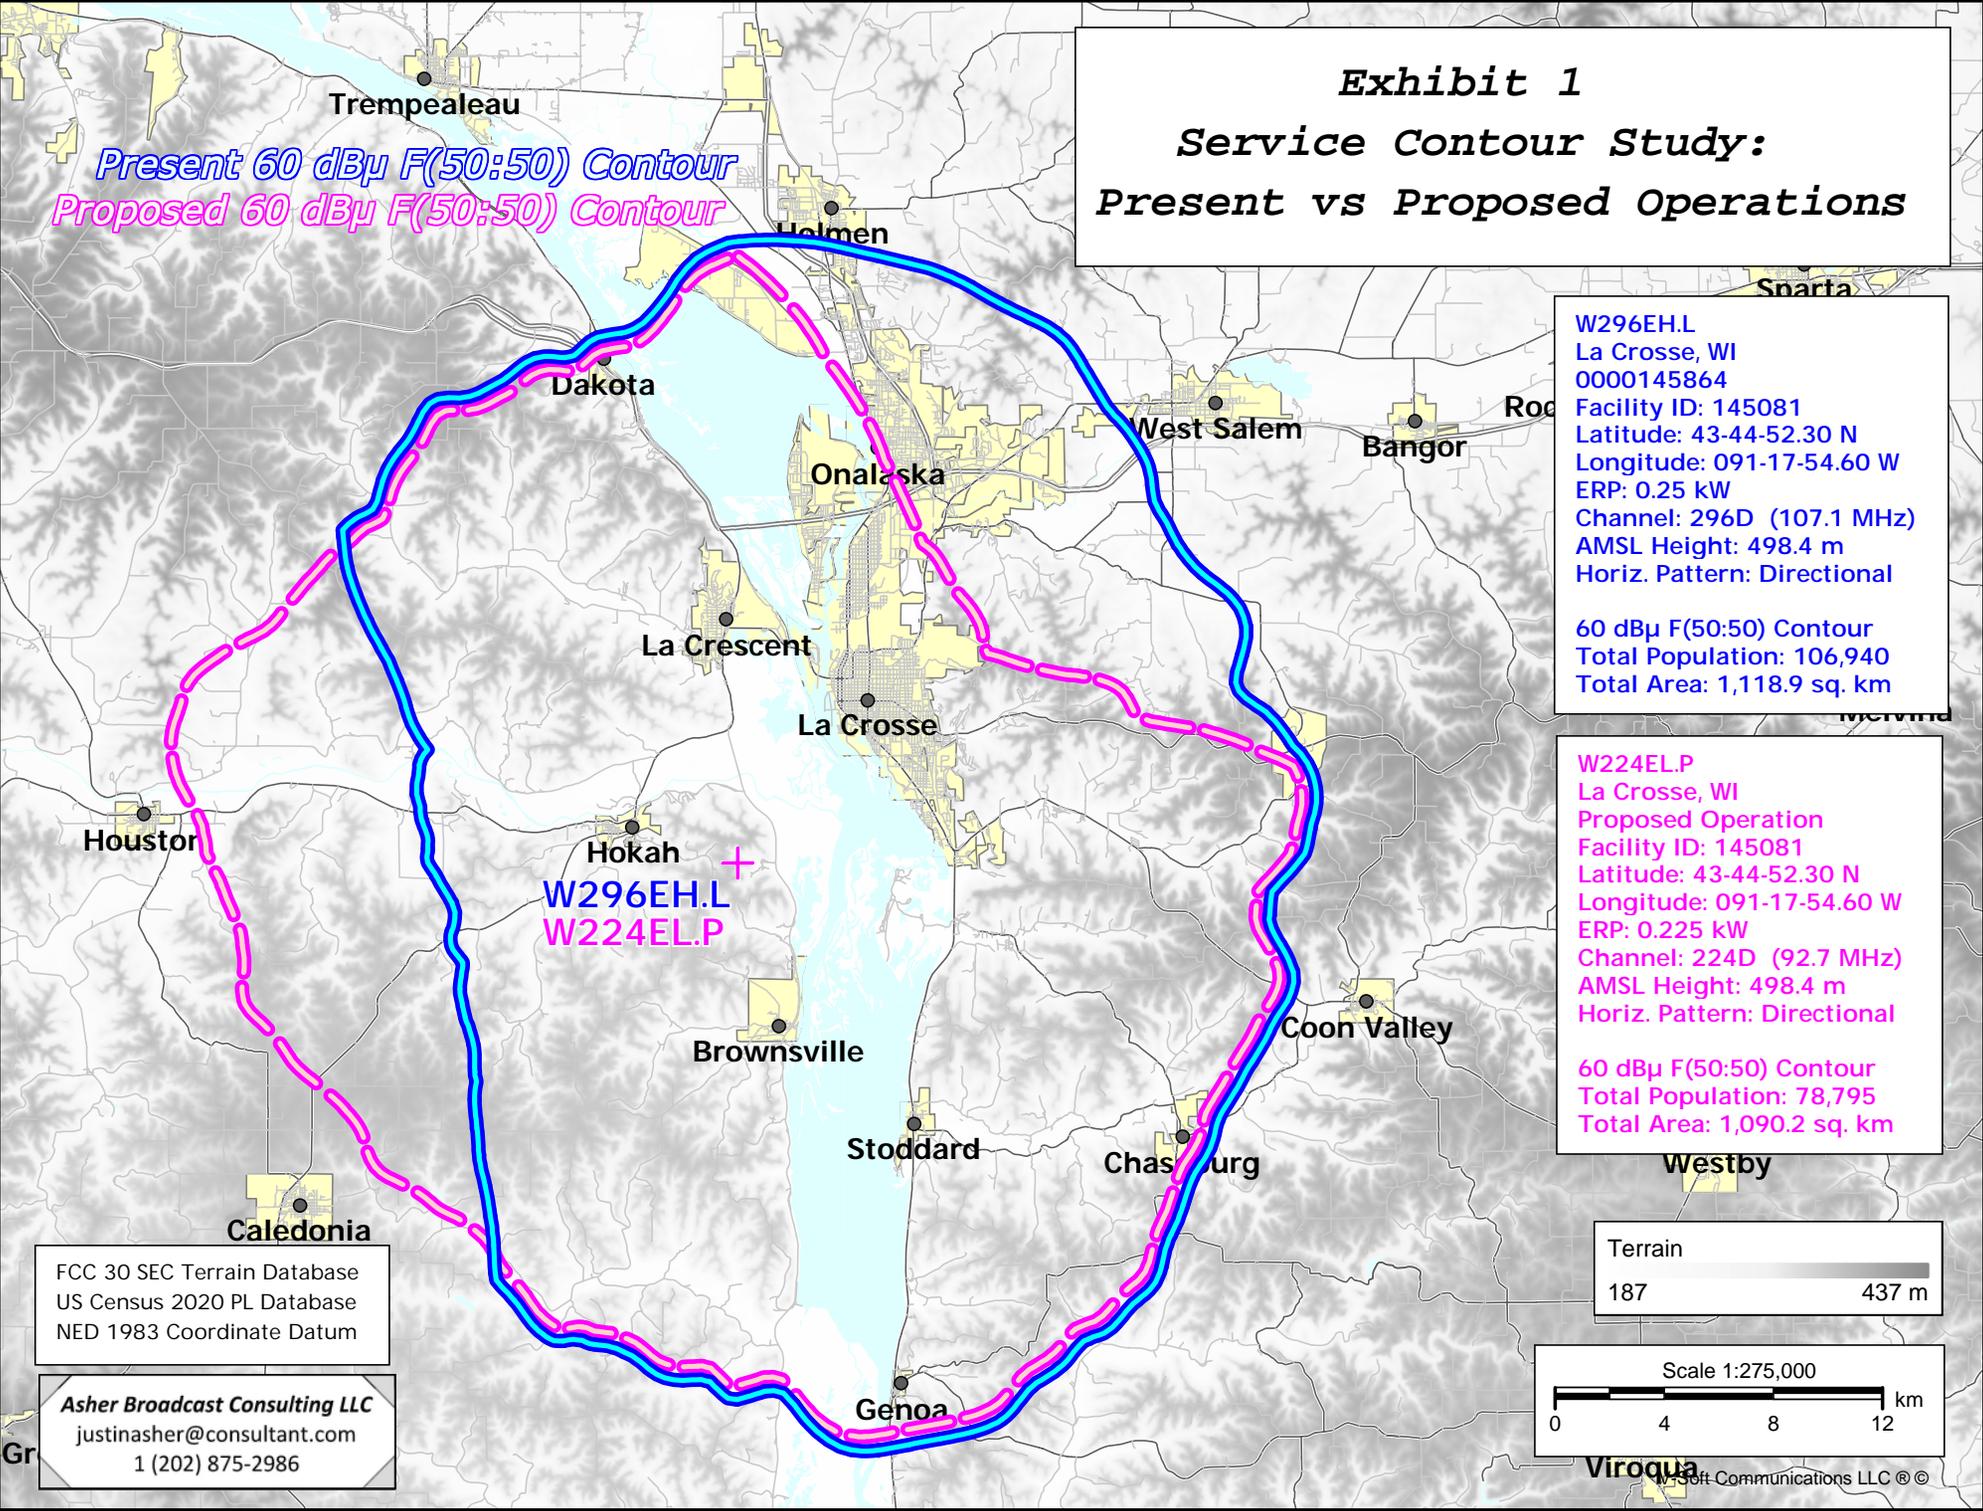

CERTIFICATION OF TECHNICAL CONSULTANT: *I declare, under penalty of perjury, that the contents of this report are true and accurate to the best of my knowledge and belief. I further certify I have over twenty-four years of experience as a broadcast technical consultant before the Federal Communications Commission ("the FCC"); and am familiar with the Code of Federal Regulations Title 47 ("the Rules") as pertaining to this report and its contents herein. The underlying data utilized in this report was taken directly from FCC databases or indirectly through third party software vendors securing data directly from FCC databases. This firm cannot be held liable for errors or omissions resulting from the underlying data. The information contained herein is believed accurate to the date reported below.*

Exhibit 6

Tabulation of Proposed Allocation

Grey Text indicates Allotment (ALO), Reservation (RSV), Deleted (DEL) or the facility to be modified herein. These concerns need not be protected.

Blue Text indicates contour protection studies toward select stations as included in [Exhibit\(s\) 7\(a-c\)](#).

Yellow Text denotes the existence of a 47 C.F.R. Section 74.1204(d) Second/Third Adjacent Channel Given Interference Waiver Request as included in [Exhibit 8](#).

The applicant would like to note a request for 47 C.F.R. Section 73.3517 Contingent Processing between applications for FM Translators K220EP – La Crescent, MN (Facility ID: 20571) and W296EH – La Crosse, WI (Facility ID: 145081). Both applications have been filed concurrent with one another and reference this Section 73.3517 Contingent Processing Request within each filing. In this instance, K220EP requests a site change and 47 C.F.R. Section 74.1233(a)(1)(i)(A)(1) adjacent channel change from CH220D to CH223D. To accommodate this frequency change, W296EH will further modify its currently authorized 47 C.F.R. Section 74.1233(a)(1)(i)(A)(2) non-adjacent CH296D to CH224D(W224EL.C) channel change Construction Permit (LMS(cp)-0000197677) from a non-directional antenna to a directional antenna. This NDA-to-DA antenna change for the existing W296EH(W224EL.C) facility will allow both stations to fully protect each other without the need for further contingent special conditioning at the time of each stations' licensing. (See [Exhibit 7b](#))

0.02 kW -49.6 m HAAT, 242.7 m COR
Prot.= 60 dBu, Intef.= 54 dBu

The applicant would like to note a request for 47 C.F.R. Section 73.3517 Contingent Processing between applications for FM Translators K220EP – La Crescent, MN (Facility ID: 20571) and W296EH – La Crosse, WI (Facility ID: 145081). Both applications have been filed concurrent with one another and reference this Section 73.3517 Contingent Processing Request within each filing. In this instance, K220EP requests a site change and 47 C.F.R. Section 74.1233(a)(1)(i)(A)(1) adjacent channel change from CH220D to CH223D. To accommodate this frequency change, W296EH will further modify its currently authorized 47 C.F.R. Section 74.1233(a)(1)(i)(A)(2) non-adjacent CH296D to CH224D(W224EL.C) channel change Construction Permit (LMS(cp)-0000197677) from a non-directional antenna to a directional antenna. This NDA-to-DA antenna change for the existing W296EH(W224EL.C) facility will allow both stations to fully protect each other without the need for further contingent special conditioning at the time of each stations' licensing.

Exhibit 8

47 C.F.R. Section 74.1204(d) Second / Third Adjacent Given Interference Waiver Request

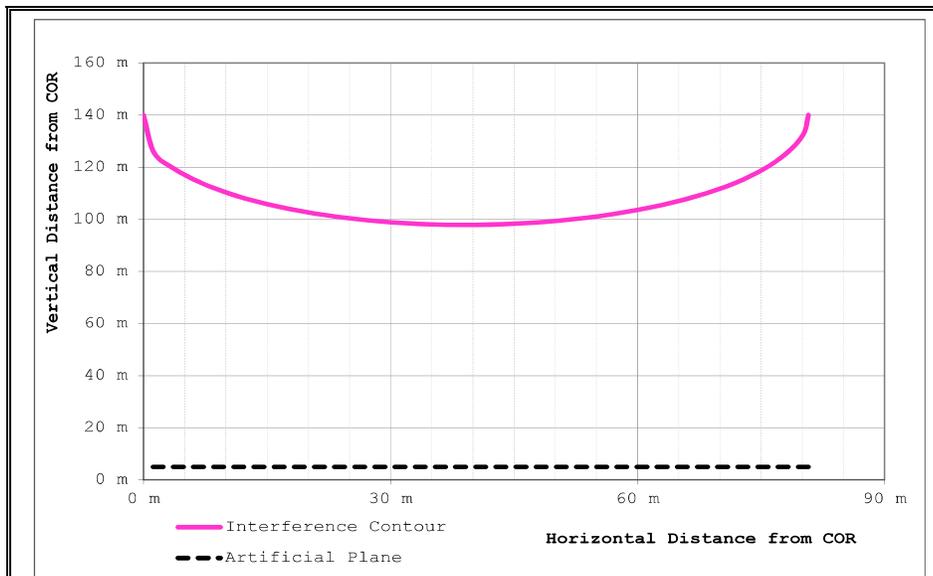

The applicant would like to note the existence of a 47 C.F.R. Section 74.1204(d) Second/Third Adjacent Channel Given Interference Waiver Request toward WIZM-FM - La Crosse, WI (CH227C0) and K222AG - La Crosse, WI (CH222D) as included in **Exhibit 8**. Protection of the worst case calculated 122.3 dBμ F(50:10) Interference Contour, corresponding to the worst case calculated 82.3 dBμ F(50:50) Protected Contour, has been demonstrated through a downward radiation study. Full protection will be afforded all concerns as this area will not reach the ground nor a five meter artificial plane representing a standard two story house when taking into account the downward radiation characteristics of the antenna as supplied by the antenna manufacturer. A copy of the manufacturer's antenna specifications has been included in **Exhibit 9**.

Signal Report ✕

WIZM-FM Signal value at Reference site = 103.7 dBu. Distance to CH224D.P interference signal contour = 6.9 m

Signal Report ✕

K222AG Signal value at Reference site = 82.3 dBu. Distance to CH224D.P interference signal contour = 80.7 m

Graph is Relative Field

The antenna proposed in this application will be mounted in accordance with specific instructions provided by the antenna manufacturer. The antenna will be tested by the manufacturer using the type of mounting which will be employed in the field.

No other antennas of any type are or will be mounted on the same tower level as the directional antenna nor will any antenna be mounted within any vertical or horizontal distance specified by the antenna manufacturer as being necessary for proper operation of the directional antenna. The antenna will be assembled under the supervision of a qualified engineer, who will provide the required certification. This statement will certify that the antenna has been installed pursuant to the manufacturer's instructions. Also upon completion of antenna construction, a statement from a licensed surveyor will be submitted with the application for license certifying the antenna has been installed in the proper orientation.

The antenna pattern will be measured by the manufacturer on the test range, and the measurement results will be supplied to the Commission at the time Form 302-FM is filed covering the construction.

FMEC SERIES CIRCULAR POLARIZED LOW POWER FM ANTENNAS

Product Specifications:

Frequency Range	88 – 108 MHz
Polarization	Circular
Power Rating	500 Watts per bay
System Input	Type N Male
VSWR	1.3:1 ± 150 kHz
Bay Dimensions	H 43.50" / W 38.5" / D 19"

Features:

•**BUILT WITH LOW POWER BROADCASTERS IN MIND.** Stations or translators that require circular, horizontal, or vertical polarizations.

•**POWER RATING.** Each bay is rated at 500 watts with a maximum power of 2 kW for four bays.

•**RUGGED CONSTRUCTION.** Each bay is constructed from rugged, heavy wall copper and naval brass. All joints are tig-welded.

•**PRESSURIZATION NOT REQUIRED.**

•**CUSTOM DIRECTIONAL PATTERNS.** FM directional antennas designed to the customer's specified mounting structure and FCC filing documentation are available.

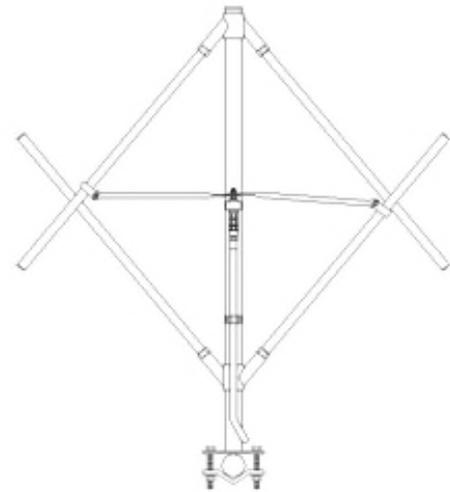

•**WEATHERIZATION (OPTIONAL).** Radomes or electrical deicers available for areas that experience periods of heavy icing and/or snow conditions.

•**STANDARD MOUNTING BRACKETS.** Fits up to 4" tower leg or pipe. Supplied with antenna.

•**WARRANTY.** 2-year limited warranty on defects and workmanship to the original purchaser.

Notes:

1. Power rating is based on 40 degrees C ambient. Degeneration occurs above 2000 ft.
2. Antenna weight, windload, aperture and dimensions are based on mid-band operation (98.1 MHz).
3. Antennas with 3 or more bays come with input power divider.
4. SWR, Inc. maintains a continuous program of product improvement and therefore reserves the right to change specifications without notice.
