

STA Extension Request
BBC Broadcasting, Inc
KRPI(AM), Station
Ferndale, WA
Facility ID No. 21416

Reason for the Extension

KRPI(AM) is licensed to operate with 50 kW power daytime and 10 kW power at night, using different directional antenna patterns. BBC Broadcasting Inc. ("BBC") previously reported that there was a problem with two of the RF contactors used to switch between day and night. Due to the retirement of KRPI's engineer, some progress has been made but completion of the work is pending the hiring of the new engineer. Specifically, the replacement contactor needs to be installed and the second contactor needs to be inspected by the engineer. BBC has made plans to resolve these issues and expects the work to be completed in the near future.

Accordingly, BBC respectfully requests an extension of its STA in order to continue serving Ferndale and its surrounding coverage area.
