**Subject:** 0000240494 - Interference

Good morning,

I was reviewing 0000240494 (K16NN-D) and found that it fails TVStudy. Specifically, it causes 52% interference to K17OS-D. In your attached TVStudy analysis, Mexican stations were included, but we do not include Mexican stations when doing our domestic evaluation. You should run your evaluation without Mexican stations included to determine if it is grantable domestically.

You have 30 days to amend the application and resolve the interference or your application will be dismissed.

Mark J. Colombo
