

REASON FOR AMENDMENT

On April 15, 2024, counsel for Assignor and Assignee were contacted through email by a member of the Commission staff who asked the parties to amend the application because “Both the assignee and assignor response to the certification question is ‘no.’ Would you please amend the response this question?”

Counsel for Assignor and Assignee checked their filed copies of the application and verified that both Assignor and Assignee had certified “yes” to the question in the original application. They communicated this to the FCC staff.

Nevertheless, on April 16, 2024, the FCC staff requested the parties to attempt to re-certify the application so that the application could be granted. That is the purpose of this amendment which changes nothing from the original application.
