

April 21, 2024

Ibero-American Action League, Inc. ("Ibero") requests an extension of its silent STA (LMS file no. 0000224180) for translator station W298CH, Rochester NY (facility ID 138910).

Ibero is currently in the final stages of building out its construction permit (LMS file no. 0000220207) to relocate the translator to a new location, new frequency and new primary station. A contract has been signed for the new transmitter location and equipment has been procured and is awaiting the availability of a tower climber and favorable weather.

Ibero expects to return the translator to the air within 30-60 days; out of an abundance of caution, it requests an additional 180-day extension of silent STA, with the understanding that the translator must return to the air no later than Oct. 20, 2024.
