

### Reduced Power STA Exhibit

Alpha Media Licensee LLC ("Alpha"), licensee of KKWK(FM), Cameron, MO, facility ID 50745, is currently operating with reduced power because the station cannot maintain ERP at or above 45KW (90%). Presently, the station is operating at 44KW TPO, and power is expected to decline further as tube emission deteriorates. A replacement final tube has been ordered and Alpha was advised the shipment will be delayed for several weeks. Special Temporary Authority to operate at reduced power is hereby requested while Alpha awaits delivery of the repair parts.
