

Compliance with Special Operating Conditions

The KMKV Construction Permit (File Number 0000243366) contains Special Operating Conditions:

1. *The permittee/licensee in coordination with other users of the site must reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.*
2. *Permittee has specified the use of an EPA Type 2 (Opposed "V"), three-sectioned, half-wavelength-spaced antenna to demonstrate compliance with the FCC radiofrequency electromagnetic field exposure guidelines. If any other type or size of antenna is to be used with the facilities authorized herein, THE AUTOMATIC PROGRAM TEST PROVISIONS OF 47 C.F.R. SECTION 73.1620 WILL NOT APPLY. In this case, a FORMAL REQUEST FOR PROGRAM TEST AUTHORITY must be filed in conjunction with FCC application for FM license BEFORE program tests will be authorized. The request must include a revised RF field showing to demonstrate continued compliance with the FCC guidelines.*

Educational Media Foundation ("EMF") complies with, or agrees to, the conditions as follows:

1. EMF in coordination with other users of the site agrees to reduce power or cease operation as necessary to protect persons having access to the site, tower, or antenna, from radiofrequency electromagnetic fields in excess of FCC guidelines.
2. EMF believes the statement in the underlying construction permit stating the use of "*an EPA Type 2 (Opposed "V"), three-sectioned, half-wavelength-spaced antenna*" was intended to state "Three Sectioned 0.85 wavelength spaced" as per the previous license grant.

KMKV utilizes an EPA Type 2 (Opposed "V"), Three Sectioned 0.85 wavelength spaced transmit antenna.

As previously stated in construction permit file number BPED-20170811AAI, Special Operating Procedure Number Two:

Permittee has specified use of the antenna listed below to demonstrate compliance with the FCC radiofrequency electromagnetic field exposure guidelines. If any other type or size of antenna is to be used with the facilities authorized herein, THE AUTOMATIC PROGRAM TEST PROVISIONS OF 47 C.F.R. SECTION 73.1620 WILL NOT APPLY. In this case, a FORMAL REQUEST FOR PROGRAM TEST AUTHORITY must be filed in conjunction with FCC Form 302-FM, application for license, BEFORE program tests will be authorized. The request must include a revised RF field showing to demonstrate continued compliance with the FCC guidelines.

Three Sectioned 0.85 wavelength spaced

Exhibit 1
Kihei, HI

EMF affirms the use of the specified antenna system, three sectioned 0.85 wavelength spaced antenna, is still in use.

Therefore, the proposed facility complies with the requirements of OET 65.
