Request for Extension of Special Temporary Authority to Remain Silent

As licensee previously reported to the Commission (LMS File Nos. 0000224562, 0000227283), KKRA-LD was forced to suspend operations on October 23, 2023 due to transmitter failure. Licensee has sent the transmitter back to the manufacturer for repairs, but the manufacturer has been unable to resolve the problem. Licensee has been working diligently to attempt to return the diagnose the problem and has now identified an additional power supply issue. Licensee has ordered a replacement part and will install that when received. Licensee is seeking extension of Special Temporary Authority to remain silent while repairs are completed and the station is returned to operation.
