

JUSTIFICATION FOR SILENT STATUS

FM Broadcast Station WSSK, Saratoga Springs, NY

Facility ID # 76980

Sound of Life, Inc., Licensee

On or about Sunday, April 28, 2024, a truck of unknown origin struck one of the guy wires of the tower (unregistered, as unnecessary) on which the antenna of FM Broadcast Station WSSK was mounted at the licensed transmitter site of the station (DMS Coordinates 43° 11' 35" North Latitude, 73° 45' 25" West Longitude). The guy wire collision badly twisted the tower at the base and at a guy point on the tower, and rendered the tower unsafe, in the opinion of the tower crew retained by the licensee and it was dismantled safely on Monday, April 29, 2024, causing WSSK to be taken off the air.

It is unclear when, or if at that location, the tower will be rebuilt by the tower owner (which is not the Licensee), and therefore the licensee requests silent authorization for a period of six (6) months within which to return WSSK (FM) to the air.
