

## EXHIBIT

West Central Ohio Broadcasting, Inc. (“WCOB”), licensee of WFND-LD, Findlay, Ohio (Fac Id 21475), is filing an application to further modify its construction permit (FCC File Number 00242036) (the “Replacement Antenna CP”) to increase the antenna height to 86.4 meters.

Upon receipt and attempted installation of the new antenna, it was discovered that, if the antenna were to be installed per the Engineering Report submitted with Replacement Antenna CP, the input (center) feed of the antenna would be at the point where the guy wire intersects. Therefore, WCOB proposes to install the antenna 2.6 meters higher than approved in the Replacement Antenna CP.

A tower crew is available in early May to install the replacement antenna at the increased height if approved by the FCC. That will enable WCOB to resume operations of WFND-LD before the expiration of the Silent STA on May 17, 2024.
