

May 2, 2024  
Station: KUDF-LP PROPOSED  
Location: ASRN 1218276

Dear Sir or Madam,

This will serve as the exhibit to document a minor modification application for KUDF-LP in accordance with CFR 47 part 74.751(b). The station proposes to move their transmission system from ASRN 1002407 on Mount Bigelow to ASRN 1218276 on Tucson Mountain. This move is 26.1 miles and there is contour overlap as shown in the separate exhibit.

The proposal will be reusing the existing antenna such that the make, model, azimuth and elevation patterns are the same with a new orientation of the azimuth pattern at an angle of 65 degrees instead of the current 210 degree orientation. For this reason, no separate azimuth pattern exhibit was prepared.

The proposal does not cause interference to other facilities that exceed FCC limits as shown in the separate TVStudy output exhibit and agrees to accept any incoming interference from other licensed facilities.

The RFR from this proposal does not exceed the general population MPE as shown in the separate exhibit.

The licensee has obtained reasonable assurance from the tower owner that he is able to collocate on the proposed tower at the proposed height.

Should you have any questions regarding this proposal please contact me.

Respectfully submitted,

A handwritten signature in blue ink that reads "James T. Stenberg". The signature is fluid and cursive, with the first name being the most prominent.

**James Stenberg**  
**Principal Engineer**
